Re: Support for KatloTech World Wide Fiber Network

We wish to convey our support for the Katlodeeche First Nation and their vision to enhance and contribute to the betterment of their First Nations community through advancing fiber optic innovative technology highway and green modular data centers throughout the NWT. The concept and approach will lead to substantially improved economic development opportunities and enhance the North's tech industry. It will support innovation for First Nations, improve employment, justify training, and fund educational opportunities for members/citizens.

We look forward to working with the KatloTech Communications and their team of specialists in the shared vision to build a better and more sustainable North using the "net-naturality " concept. Based upon information shared and provided to our consortium, we are interested in taking the next steps to build our new generation net-naturality information highway, that will benefit the North.

Sincerely,

Murray Rowe
