To Whom It May Concern:

**Re: Letter of Support For Next Generation Fiber Optic Network**

On behalf of the Indigenomics Institute, we wish to convey our support for the vision to enhance and contribute to the betterment of First Nations communities through advancing a fiber optic innovative technology highway and green modular data centers throughout the NWT. The prospect of this project in leading the development of economic development opportunities and significantly enhancing the North's tech industry and innovation for First Nations, all the while, creating employment, training, and educational opportunities for citizens is important.

Fortunately, organizations such as Katlotech Communications are leading in the development of solutions to address the gap in the north that will bring a positive impact to all Indigenous communities. At the Indigenomics Institute, we are committed to working with indigenous-owned companies to help bring positive change. By taking steps now to prepare our young people for tomorrow's jobs and to ensure that everyone has access to reliable, broadband connectivity.

The Indigenomics Institute is leading the development of a framework for the emerging 100 billion dollar annual Indigenous economy in Canada. Technology and connectivity must play a significant role in this achievement.

We wish Katlotech Communications success in this project and we look forward to the prospective benefits at project completion.

Uniting business and culture,

*Carol Anne Hilton*
